## RANGEMASTER\_ INTERCEPTOR

Rangemaster Precision Arms PO Box 441, Tonbridge, Kent TN9 9DZ England
Telephone: +44 (0) 845 880 3222 Fax: +44 (0) 845 880 3232 Email: info@rangemasterprecisionarms.com Web: www.rangemasterprecisionarms.com ISO 9001-2000 RANGEMASTER operates a policy of continuous development and the information in this brochure may be updated without notice.

A high performance sporting rifle manufactured from RANGEMASTER's + FIRST CLASS PEDIGREE world beating products, designed for professionals and enthusiasts alike. The heart of the RANGEMASTER Interceptor is the RANGEMASTER 4-lug Quadlite® action renowned for unrivalled accuracy, durability and safety. This will probably be the most accurate rifle you will ever own.

Interceptors are available in single shot left or right handed formats and a wide range of calibre options. They are fitted with our own two stage trigger, equipped with a 2-position safety catch. Barrels are threaded to allow for easy fitting of the RANGEMASTER muzzle brake or a suppressor.

The heart of any rifle is the receiver, developed from the Quadlock® and designed with the gun connoisseur in mind; the Quadlite® is designed for long range competition, sporting, varmint and bench shooters alike.

Built using over 30 years experience of high power long range competition target shooting the Ouadlite® has a first class pedigree.

#### **♦** SAFETY & ENGINEERING

Interceptor stocks are crafted from epoxy with glass and kevlar reinforcement, with a durable epoxy gel-coat outer layer before a final textured 2 pack paint finish.

The bedding area is made up with a hard solid fill of epoxy and resin; the butt and forend is an epoxy and glass ball fill for balance.

The materials are of the highest specification and type approved for composite aircraft construction. Standard colour is black, other colours to special order.

### CRAFTED PRECISION

You know when you have a quality product in your hands, the beautifully balanced stock, smooth bolt operation and crisp trigger. Once you have experienced the joy of shooting the Interceptor we feel sure you will become a customer for life.

#### **FLEXIBILITY**

Interceptor stocks are ambidextrous and supplied with an adjustable cheek piece; fixed butt plate with spacers as standard. An adjustable three position butt can also be supplied to order or can be readily retro-fitted.

All exposed aluminium parts are anodised for durability and protection against the elements. RANGEMASTER two stage triggers were developed for competition shooters; this design has been incorporated into the Quadlite® trigger used in the Interceptor.

# RANGEMASTER INTERCEPTOR

#### - BENEFITS

- Trigger
- Adjustable finger pull
- Available in two weights 0.5kg & 1.50kg
- Hardened and burnished pivots to reduce friction
- Smooth operation
- All models have a two position safety catch
- One piece bolt incorporating a cocked "tell tale"

- Passive ejector for reliable operation
- Receiver drilled to accept scope rails
- Short firing pin travel provides for very fast lock time (less than 1.5 milliseconds)
- Heavy duty recoil plate has locator spigot to allow barrel removal and re-fitting without compromising the position of the plate to the bedding
- Modern shape and materials, finished in satin black, high wear and corrosion resistant finish

- Firing pin is a single piece of high tensile steel hardened and tempered
- High tensile steels and solid construction make it the safest rifle available

As the designer and manufacturer of your Interceptor, who better than RANGEMASTER to service your rifle annually.
