TARGET RIFLES

A high performance Target Rifle manufactured from RANGEMASTER's world beating products, designed for professionals and enthusiasts alike. The heart of RANGEMASTER Target Rifles is either an RANGEMASTER Quadlock® or Quadlite® action, renowned for accuracy, durability and safety. Available in a true left hand configuration (custom option).

✦ CRAFTED PRECISION

- Action and bolt coatings are extremely hard wearing, corrosion resistant and have a very low coefficient of friction; wear is therefore greatly reduced.
- Triggers are fully adjustable and easily maintained. RANGEMASTER Target Rifles feature a two stage trigger operation with a pull weight factory set at 1.5Kg. An extremely fast lock time (time from trigger pull to detonation) is 1.5 milliseconds. This further improves accuracy when shooting at long range.

✦ SAFETY & ENGINEERING

Safety is a major factor with RANGEMASTER rifles, the receiver and bolt is produced from a solid billet of high tensile steel, there are no internal components to work loose and cause injury to the rifle operator.

✦ RANGEMASTER ELITE

This will probably be the most accurate Rifle you will ever own. Designed for the precision shooter. The heart of the RANGEMASTER Elite Target Rifle is the RANGEMASTER 4-lug Quadlock® action, bedded into a beautifully crafted composite stock, in your choice of colour. This stock comes fitted with an adjustable magnetic removable cheek piece [A], forend rail [B] and a 3 way adjustable butt plate [C] as standard.

Rear sight fitment is direct onto the action via the inbuilt dove tail. The action is drilled and tapped to accept a scope rail.

✦ RANGEMASTER RANGER

This rifle offers an alternate target rifle design and will satisfy those shooters who prefer a lighter and more traditionally styled rifle. The heart of the RANGEMASTER Ranger® is the RANGEMASTER 4-lug Quadlite® action. The stock comes fitted with an adjustable cheek piece with length of pull adjustment by removable spacers. Available in your choice of colour.

Rear sight fitment is via a sight mounting bracket (supplied). The action is drilled & tapped to accept a scope rail.
